SUMMARY

Aspiring Quality Assurance professional with a solid foundation in manual testing, test case design, and programming fundamentals. Recently authored a QA-focused article on manual testing best practices, demonstrating analytical thinking, attention to detail, and a strong commitment to knowledge sharing. Eager to contribute to QA team through test design, exploratory testing, and collaborative quality efforts

EDUCATION

BEng (Hons) Software Engineering   **Jan 2024 - Present**

Affiliated with the University of Westminster - UK
Studies at Informatics Institute of Technology (IIT) - Sri Lanka

Advanced Level Examination   **Jan 2021 - Feb 2023**
Sujatha Vidyalaya - Matara
- Achieved 1.7 Z-Score, 3A's in Commerce Stream, and 111th rank in the Matara District

CERTIFICATIONS

Software Testing Professional Certificate (LambdaTest)   **May 2025**
[View Certificate]

Agile Testing – LinkedIn Learning   **May 2025**
[View Certificate]

Succeeding in Software Testing – LinkedIn Learning   **May 2025**
[View Certificate]

Postman API Fundamentals Student Expert - Postman   **Feb 2025**
[View Certificate]

DevOps 101 - Simplilearn   **March 2025**

Problem Solving - Hackerrank   **Oct 2024**
[View Certificate]

Java (Basic) - Hackerrank   **July 2024**
[View Certificate]

SKILLS

- **Testing & QA:** Manual Testing, Test Case Design, Functional Testing, Exploratory Testing, REST API Testing (Postman), UI Testing, QA Documentation, Agile Methodologies, Test Management, Defect Reporting
- **Tools & Technologies:** Playwright (learning), Postman, Jira, Xray (learning) Git
- **Programming:** Java, JavaScript, Python (basic), OOP Concepts, Test Automation Concepts

- **Development:** HTML, CSS, JavaScript (front-end basics)
- **Methodologies:** Agile
- **Soft Skills:** Analytical Thinking, Communication, Team Collaboration, Problem Solving, Time Management, Quick Learner

PROJECTS

Manual QA Testing – OrangeHRM Demo Web App   **2025**

- Performed functional, UI, and exploratory testing on a demo HRM system.
- Designed and executed 20+ manual test cases across core modules.
- Logged bugs with severity levels and documented test cases.
- Practiced defect tracking and created organized bug reports.
- Currently learning to replicate tests using Playwright and basic Linux terminal commands for automation practice.

Event Extravaganza - Academic Group Project   **2025**

- Led task tracking and test planning using ClickUp.
- Wrote test scenarios and manual test cases for sprint validation.
- Participated in QA sync-ups and identified project risks.
- Tech Stack: React, Node.js, MongoDB

UN SDG Project – Life Below Water Awareness Platform — Academic Group Project   **2024**

- Conducted usability, functional, and manual UI testing for awareness features using Chrome DevTools.
- Documented bugs and tracked blockers to improve release quality.
- Collected team feedback and performed manual testing to enhance quality.
- Tech Stack: HTML, CSS, JavaScript
